A Strategic Business Plan to Disrupt Product Management Education.

Targeting high-intent operators in the Indian tech ecosystem, we leverage an active-execution pedagogy and organic distribution to eliminate acquisition costs and democratize access to elite product frameworks.

Product Strategy: Value Prop Canvas

Applying the **Value Proposition Canvas** to ensure perfect product-market fit. By deeply mapping the specific frustrations of aspiring Product Managers against our core features, we create a highly differentiated pedagogical moat that legacy ed-tech cannot replicate.

CUSTOMER PROFILE

Customer Pains:

- **Passive Learning:** Most resources rely on static reading, failing to build execution skills.
- **Paywalled:** Entry-level Indian cohorts charge ₹15k-₹40k just for foundational theory.

Customer Gains:

- Pass PM job interviews with absolute confidence.
- Learn by *doing* through actual product decisions.

OUR VALUE MAP

Pain Relievers:

- **Active Execution:** We force users to make strategic decisions via branching simulations.
- **100% Free:** Removing the upfront financial barrier for entry-level talent.

Gain Creators:

- Immediate, operator-level feedback on every decision.
- Direct recruitment pipelines to enterprise tech companies.

Market Analysis: Sizing & SWOT

Evaluating the macro-opportunity using the **TAM SAM SOM Model** to prove venture-scale potential within the Indian market. Simultaneously, we assess internal operational capabilities and external risks using a rigorous **SWOT Framework**.

MARKET SIZING (INDIA)

SWOT PROFILE

S

Organic Flywheel

High-quality free tools drop our CAC to zero.

W

Founder Dependency

Year 1 execution relies entirely on uncompensated time.

O

B2B Recruitment

Charging enterprises for access to top simulation scorers.

T

AI Disruption

LLMs can easily summarize text, threatening our core moats.

Marketing Strategy: 4Ps & Projections

Our **Marketing Mix (4Ps)** is fundamentally dynamic. As we execute against our 3-Year growth projections, our product offering, pricing leverage, and distribution channels evolve to capture a wider audience.

Product

Evolution: Starts as a niche PM library (Yr 1) and scales into a massive multi-vertical (Startups, Design, Finance) ecosystem.

Place

Evolution: Launches hyper-localized for the Indian tech niche, then broadens into a universally accessible global operator platform.

Price

Evolution: Sustains \$0 B2C access to build the user moat, eventually unlocking high-ticket B2B Enterprise SaaS as traffic scales.

Promotion

Evolution: The foundational LinkedIn organic flywheel eventually expands to cross-pollinate traffic across multiple sub-newsletters.

GROWTH PROJECTIONS

YEAR 1 (NAIL PM)

50,000 MAU

10,000 Subs

YEAR 2 (+STARTUPS)

150,000 MAU

35,000 Subs

YEAR 3 (MULTI-VERTICAL)

300,000+ MAU

80,000 Subs

Financial Plan: Unit Economics Model

Financial sustainability is modeled via **Unit Economics (LTV:CAC)**.

Our Customer Acquisition Cost (CAC) is held firmly at \$0 through our organic SEO and LinkedIn content flywheel.

By utilizing serverless architecture, fixed infrastructure costs remain under \$50/month. Therefore, the Lifetime Value (LTV) of even a single B2B enterprise client yields infinite operating leverage, allowing us to bootstrap profitability immediately.

METRIC	TARGET
Customer Acquisition Cost (CAC)	\$0.00
Gross Profit Margin	85%

REVENUE PROJECTION MATRIX

Operations: The SIPOC Model

To sustain a high volume of output (10+ assets per week) with a lean team, we structure our operational pipeline strictly using the **SIPOC Model** (Suppliers, Inputs, Process, Outputs, Customers). This standardized workflow ensures quality control and eliminates bottlenecks prior to scaling.

Scaling Strategy: Tuckman's Model

We map our 24-month multi-vertical expansion using **Tuckman's Stages of Group Development**. As we hit predetermined revenue and traffic milestones, we methodically shift from a flat founding team to a highly specialized hierarchy capable of supporting a \$3M+ digital asset portfolio.
